

INSECT PESTS OF CABBAGE IN MT. MALINDANG (Mga Dangan sa Repolyo sa Mt. Malindang)

E. Sabado, B. Gutos, R. Almorado, E. Padogdog, Jr., & M. Dahug, *Mindanao State University, Marawi City*
S. Reyes & V. Gapud, *Department of Entomology, University of the Philippines Los Baños, Laguna*
R. Tautuan & V. Cagas, *Department of Agriculture, Don Victoriano, Misamis Occidental*
L. Ledres, *Central Mindanao University, Musuan, Bukidnon*

¹Larvae of Diamondback moth, *Plutella xylostella*
Attack cabbage from seedling up to maturity
Bitay-bitay - Moatake sugod sa semilya hangtud sa pagkabantok

²Larva of Cabbage looper, *Trichoplusia ni*
Attacks cabbage from seedling up to maturity
Dangaw-dangaw - Moatake sugod sa semilya hangtud sa pagkabantok

³Aphids, *Myzus persicae*
Attack cabbage from seedling up to maturity
Dugos-dugos - Moatake sugod sa semilya hangtud sa pagkabantok

⁴Larva of Cabbage worm, *Crocidolomia pavonana*
Attacks cabbage from seedling up to maturity
Tapok-tapok - Moatake sugod sa semilya hangtud sa pagkabantok

⁵Larva of Common cutworm, *Spodoptera litura*
Attacks cabbage from seedling up to maturity
Ordinaryong utlob - Moatake sugod sa semilya hangtud sa pagkabantok

⁶Larva of Black cutworm, *Agrotis* sp.
Attacks cabbage from seedling up to maturity
Itom na utlob - Moatake sugod sa semilya hangtud sa pagkabantok

⁷Pupa of Cabbage leafminer, *Liriomyza* sp.
Larvae attack cabbage from seedling up to maturity
Langaw-langaw - Moatake sugod sa semilya hangtud sa pagkabantok

⁸Slug caterpillar, *Thoesa philippina*
Attacks cabbage from seedling up to maturity
Til-as - Moatake sugod sa semilya hangtud sa pagkabantok
